TO MAKE UP
☐ Use a tapestry needle to weave in ends. Make tassels and attach to bottom edge of shawl. To do this, cut six 20cm lengths of first shade of yarn, hold them together and fold them in half. Insert hook through the centre ch sp of fan motif, working from back through to front, and pull the loop of the strands through. Ease the strands back through the loop to secure. Rep to make a tassel for each fan motif in a matching colour. Finally, trim all tassels to neaten **LK**

Working tr2tog

In this pattern, tr2tog is made by working the first two parts of first treble into the same place as the previous stitch, leaving the last part unworked on the hook. Insert the hook into the centre chain space of the last fan and work the first two parts of the next treble, leaving four loops on the hook. Pull the yarn round the hook and through all four loops. This creates a complimentary decrease at the end of the row without having to slip the stitches, and leaves the hook in the right place for the next row.

Perfect FIRST SHAWL project

great ADVICE

"This shawl has been made using four colours of yarn to really show off the gorgeous shades of the Felinfach range. If you'd rather stick to just one shade, you'll only need three skeins for this entire project."
