

LGC kit, plus keyrings, 3.75mm hook, stuffing, black beads

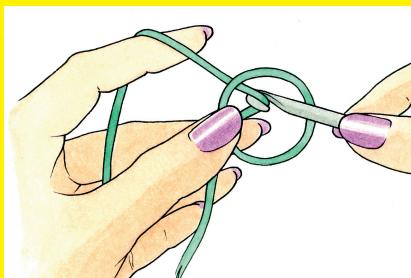

Newcomers to amigurumi will love these simple keyring critters

MAGIC RING

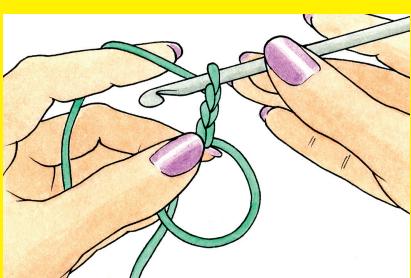

The magic ring is an easy way of beginning to work in the round. It is often used when making amigurumi toys

1 Make a large loop by putting the yarn tail behind the working yarn.

2 With your hook, draw the working yarn through the loop, so you have one loop on the hook.

3 ch (counts as first tr).tr into the loop, crocheting over the tail.

4 Continue to work as many trs as needed into the loop. Once finished, untwist the tail if necessary then pull to close the loop.

Make sure you never lose keys again with the assistance of these cute amigurumi animals. Worked in fewer pieces to create a solid shape it won't take long before they're finished. Once you're confident, try customising with different colours and stripes for alternative results.
